Personal Statement

I am a motivated and forward-thinking young web developer with a passion for developing new and exciting user experiences. I have a strong ambition to push the envelope and make a difference in this ever evolving practice. With experience in both the structural and graphical sides of web development, I believe my skillset and new ideas will be of a significant benefit to the industry. I am quick learner and eager to learn new technologies and skills.

I am currently looking for junior web developer roles in front-end, back-end or full-stack development in companies seeking attractive and exciting new developers.
